alessandro.perchiazzi598@gmail.com | alessandroperchiazzi.com | github.com/alessandvoken | linkedin.com/in/alessandro-perchiazzi

Frontend engineer with 3+ years of production React and TypeScript, mostly at IBM, building data-heavy, accessible, responsive interfaces. I own an AI platform's frontend end to end and deliver features in large cross-functional teams. Outside client work, I ship full-stack Next.js apps with the App Router and Server Components.

Skills

Languages: TypeScript, JavaScript, HTML, CSS

Frameworks & Libraries: React, Next.js (App Router, Server Components), TanStack Query, TanStack Router, Zustand

UI & Accessibility: Tailwind CSS, Storybook, React Aria, Framer Motion, WCAG 2.1 AA, responsive design

Testing, Tools & APIs: Vitest, React Testing Library, Playwright, Git, Azure DevOps CI/CD, REST APIs, WebSockets

Experience

Frontend Engineer · **IBM**, Digital Product Engineering March 2024 – Present

PLAI / ETC · AI legal platform, State Accounting Office July 2024 – Present

- Sole frontend engineer on an AI platform for legislation search and legal drafting (Italian Digital Agenda Award 2025). Design its architecture with the full-stack lead and define API contracts and UI flows with backend engineers, designers and business analysts.
- Lead the unification of two apps into one platform with a shared Microsoft (MSAL) sign-in, from React 18 / JavaScript / Redux to React 19 / TypeScript / Zustand + TanStack Query, on Verso, the client's web-component library and design system.
- Cut ~630 KB gzipped from the initial load to improve load performance, splitting the app into 22 on-demand chunks.
- Reach 98% on the client's WCAG 2.1 AA audits (80% required), with keyboard-navigable data grids over virtualized tables and tagged PDFs (PDF/UA).
- Write and maintain ~940 tests (Vitest + Testing Library), with coverage gates in Azure DevOps CI/CD.

DGT · Case management, Italian tax courts June 2025 – Present

- Develop a case-management platform for ~2,000 lawyers and judges, an embeddable React 19 + TypeScript micro-frontend.
- Own two core areas end to end, from REST APIs with RTK Query to paginated, sortable TanStack Table grids and React Hook Form + Zod fields with validation announced to screen readers.
- Review teammates' pull requests in a large team of frontend and backend engineers, QA and designers, and turn complex legal requirements into UI flows with the client.

Virtual Expert · AI chatbot, National Customs Agency January 2025 – May 2025

- Co-developed a real-time AI assistant in React + TypeScript on the chatscope component library: answers with cited sources over WebSocket, automatic reconnection and OIDC sign-in on AWS Cognito.

BPER Banca · Banking platform March 2024 – June 2024

- Delivered features, fixes and tests on the bank's design system in Storybook, and reviewed pull requests.

Frontend Developer · **Freelance**, London (UK) August 2023 – February 2024

- Built and maintained websites and React web apps for photographers, from requirements to deployment.

Documentary Photographer · **Freelance**, London (UK) February 2017 – January 2023

- Shot and edited long-form documentary stories in London and the Caucasus, featured in several publications.

Independent Projects alessandroperchiazzi.com

Team Planner | Next.js, TypeScript, Tailwind CSS, PostgreSQL, Supabase | team-planner-delta.vercel.app
A sprint board on the Next.js App Router with Server Components and Server Actions, keyboard-accessible drag and drop, and concurrent edits that never overwrite a teammate's change.

Bulk Operations Dashboard | React, TypeScript, TanStack Query, TanStack Router | bulk-operations-dashboard.vercel.app
Sends reminders for a batch of invoices and handles the ones that fail: temporary failures can be retried on their own, and reminders can be undone.

Multiselect Wrapper Component | React, TypeScript, Vitest, Playwright | react-multiselect-with-tags.vercel.app
An accessible multi-select built on react-select that keeps choices as a draft until OK, so a filter fetches results once instead of on every click.

Education

Codecademy, Online · Front-End Engineer Career Path 2022 – 2023

University of the Arts London, London (UK) · BA (Hons) Photojournalism & Documentary Photography 2017 – 2020

Certifications

Anthropic Certified Associate (CCAO-F) 2026

AWS Certified Cloud Practitioner (CLF-C02) 2025
