Frontend engineer with 3+ years of React and TypeScript, mostly at IBM. I own the frontend of an award-winning AI legal platform and work on Italy's tax court system. With design, QA and backend, I build interfaces held to strict accessibility audits. I also build independent full-stack Next.js products.

Skills

Languages: TypeScript, JavaScript, HTML, CSS

Frameworks & Libraries: React, Next.js, TanStack Query, TanStack Router, Zustand

UI & Accessibility: Tailwind CSS, Storybook, React Aria, Framer Motion, WCAG 2.1 AA, responsive design

Testing, Tools & APIs: Vitest, React Testing Library, Playwright, Git, Azure DevOps CI/CD, REST APIs, WebSockets

AI Tooling: Claude Code, opencode, IBM Bob

Experience

Frontend Engineer · **IBM**, Digital Product Engineering March 2024 – Present

State General Accounting Department · AI legal platform July 2024 – Present

- Sole frontend engineer on an AI platform for legislation search and legal drafting (Italian Digital Agenda Award 2025). Design its architecture with the full-stack lead and define API contracts and UI flows with backend engineers, designers and business analysts.
- Lead the unification of two apps into one platform with a shared Microsoft (MSAL) sign-in, from React 18 / JavaScript / Redux to React 19 / TypeScript / Zustand + TanStack Query, on Verso, the client's web-component library and design system.
- Cut ~630 KB gzipped from the initial load by splitting the app into 22 on-demand chunks.
- Reach 98% on the client's WCAG 2.1 AA audits (80% required), with keyboard-navigable data grids over virtualized tables and tagged PDFs (PDF/UA).
- Write and maintain ~940 tests (Vitest + Testing Library), with coverage gates in Azure DevOps CI/CD.

Department of Tax Justice · Tax litigation platform June 2025 – Present

- Develop a case-management platform for ~2,000 lawyers and judges, an embeddable React 19 + TypeScript micro-frontend.
- Own two core areas end to end, from REST APIs with RTK Query to paginated, sortable TanStack Table grids and React Hook Form + Zod fields with validation announced to screen readers.
- Review teammates' pull requests in a large team of frontend and backend engineers, QA and designers, and turn complex legal requirements into UI flows with the client.

Italian Customs and Monopolies Agency · AI chatbot January 2025 – May 2025

- Co-developed a real-time AI assistant in React + TypeScript on the chatscope component library: answers with cited sources over WebSocket, automatic reconnection and OIDC sign-in on AWS Cognito.

BPER Banca · Banking platform March 2024 – June 2024

- Delivered features, fixes and tests on the bank's design system in Storybook, and reviewed pull requests.

Frontend Developer · **Freelance**, London (UK) August 2023 – February 2024

- Built and maintained websites and React web apps for photographers, from requirements to deployment.

Documentary Photographer · **Freelance**, London (UK) February 2017 – January 2023

Independent Projects alessandroperchiazzi.com

Team Planner | Next.js, TypeScript, Tailwind CSS, PostgreSQL, Supabase | team-planner-delta.vercel.app
A sprint planning tool where a team plans, tracks and unblocks its work together.

Bulk Operations Dashboard | React, TypeScript, TanStack Query, TanStack Router | bulk-operations-dashboard.vercel.app
An invoice admin tool built around one problem: what happens when a bulk action partly fails.

Multiselect Wrapper Component | React, TypeScript, Vitest, Playwright | react-multiselect-with-tags.vercel.app
An alternative multi-select built on react-select, made for filters: choices stay a draft until OK, so results load once.

Education

Codecademy, Online · Front-End Engineer Career Path 2022 – 2023

University of the Arts London, London (UK) · BA (Hons) Photojournalism & Documentary Photography 2017 – 2020

Certifications & Languages

Anthropic Certified Associate (CCAO-F) 2026 | **AWS** Certified Cloud Practitioner (CLF-C02) 2025

English: C2 (14 years in the UK) | **Italian:** Native
